Notes

Aim of Programme

Bowel Screening Wales is responsible for the NHS bowel screening programme in Wales. The aim of the programme is to reduce mortality from bowel cancer by 15% in the invited group by 2020.

Eligible Population

Men and women aged between 60 and 74 years are currently invited for screening.

Uptake Target

>=60% of invited people will participate in the screening programme after 6 months, that have not had their invitation letter and test kit returned undelivered and that have returned a used test kit which has been validated with a negative or positive result (excludes spoilt and equivocal results).

Lower Layer Super Output Area (LSOA)

Each LSOA is meant to have a comparable population size
Minimum number of residents: 1000
Maximum number of residents: 3000
Number of LSOA’s in Wales (2011 Census): 1909

‘No data reportable’

If the number of eligible screening participants <30 the data was deemed not reportable.
